OBJECTIVE

Seeking a dynamic and growth-oriented position in a reputable organization that values innovation and professional development, where I can contribute to impactful projects while enhancing my technical and analytical skills.

SUMMARY

Experienced Frontend Developer with 3 years of proven and hands-on experience in building web applications using the modern technologies like Next.js, React.js, JavaScript, TypeScript, Redux, Mobx, Material UI, HTML, CSS, and GraphQL. Proficient in developing reusable UI components with a strong emphasis on functional programming concepts. Demonstrated ability to collaborate closely with business analysts and understanding business requirements.

SKILLS

Languages: JavaScript, TypeScript, HTML, CSS, Java.

Technologies and Tools: React.js, Next.js, Redux, Recoil, MobX, Material UI, Tailwind CSS, Bootstrap, Rest API, Node JS, Sanity.io, Strapi.io, GIT, JIRA, Express.js, MongoDB

WORK EXPERIENCE

| 06/2022 - Present | Software Developer | Techouts |
|-------------------|---|----------|
| | <ul style="list-style-type: none">Experienced in JavaScript, familiar with the latest syntax i.e., ES6 concepts, with a proficient understanding of React JS, Next JS, Typescript, and Nodejs.Experienced in UI development technologies including Next.js, React.js, HTML, CSS, Material UI, and API utilization.Developed code for user interfaces, encompassing interactions, responsive layouts, and styling to ensure an optimal user experience.Proficient in Agile/Scrum methodology for effective product development.Implemented Reusable UI components based on Figma designs and collaborated closely with Visual Designers to deliver UI and Figma designs from conception to implementation.Collaborated with other team members, functioning closely and collectively with Backend Developers and Solution Architects and implemented optimized network calls and REST API interactions. | |

PROJECT

IHCL Taj

<https://tajhotels.com>

Taj, an iconic brand of the Indian Hotels Company Limited (IHCL), is India's leading hospitality brand. With over 116 years of legacy, Taj is renowned for its impeccable service, genuine warmth, and luxurious properties, embodying Indian heritage and global excellence.

- Developed responsive, interactive, dynamic, and Progressive web application using modern front-end Meta framework and libraries such as React.js and Next.js .
- Collaborated with sanity.io - CMS Team to develop dynamic components and web pages using headless architecture.
- Responsible for end-to-end implementation processes, including requirement gathering, analysis, and deployment, ensuring on-time delivery with high quality. Involved in integrating REST APIs and utilizing the MobX package for effective application state management.
- Collaborated closely with the QA team to streamline bug reduction efforts, enhance page performance, and ensure high-quality user experiences.

Vivanta is a vibrant and stylish brand under the Indian Hotels Company Limited (IHCL), catering to contemporary travelers with a blend of chic aesthetics and spirited service.

- Worked closely with Business Analysts to assess business data, enhance decision-making, and facilitate the transition from concept to implementation. Additionally, played a client-facing role, regularly engaging with client SMEs to gather requirements and clarify details.
- Expertized in developing dynamic and responsive web components using ReactJS and NextJS using CMS data from Sanity.io .
- Developed the Booking, My Account, and Enquiry Form by integrating REST APIs and other third-party APIs, utilizing the MobX package for application state management.
- Enhanced web page performance by implementing code splitting, lazy loading, and React memoization techniques, reducing initial load time by 70-80% and boosting Core Web Vitals scores.

PET PROJECTS

VEIL VOICE

<https://veil-voice.app>

- Secure user authentication with Express and MongoDB, including email-based OTP verification.
- Leveraged Google Gemini for intelligent message suggestions.
- Created a responsive user interface using Shadcn, tailwind and Next.js framework

PAWS PALACE

<https://paws-palace.app>

- Responsive UI created with Material UI
- User Login/Registration using REST APIs
- API endpoints

UserHub API Services

<https://github.com/api-service>

- Used Node, Express and MongoDB as backend
- Implemented Login Functionality with JWT token, REST API and bcrypt js

ACHIEVEMENTS

2023

The Radiant Rookie

In recognition for my outstanding contributions to the Techouts as a Frontend Developer
